

The background of the image is a digital tunnel or corridor. The walls and floor are composed of a grid of small, dark, rectangular blocks that create a sense of depth and perspective. The lighting is a mix of vibrant purple and blue, with bright lines of light running along the walls and floor, creating a high-tech, futuristic atmosphere. The overall color palette is dominated by these cool tones, with some lighter purple accents on the right side of the image.

EXTENSION TO YOUR ELECTRONIC SUPPLY CHAIN

# OVERVIEW

Flytronics, a subsidiary of Flyking Tech Ltd, is dedicated to delivering bespoke supply chain solutions to OEMs, EMS, and manufacturing partners. Renowned and certified as a premier global distributor of electronic components, we offer comprehensive procurement solutions tailored to the unique requirements of global manufacturing sectors. Our services include franchised distribution lines, shortage mitigation, PPV cost-saving programs, NPI BOM-kitting, and expert excess management.

Furthermore, Flytronics holds recognition as a leading authorized distributor for over 30 prestigious original semiconductor manufacturers. Our overarching aim is to provide more cost-effective electronic supply chain solutions for our discerning clientele, effecting cost reductions whilst at the same time enhancing operational efficiency and higher level of services.

# QUALITY MANAGEMENT SYSTEM

## Supplier Management

Each new supplier undergoes a vendor approval process followed by timely transaction-based audits.

Our laboratory is equipped with the state-of-art equipment and manned by experienced Quality Inspection engineers. We have been recognized by our partners and ISO9001 certified. With AS6081 as the testing standard, our lab conducts in-depth analysis of electronic components in various aspects.

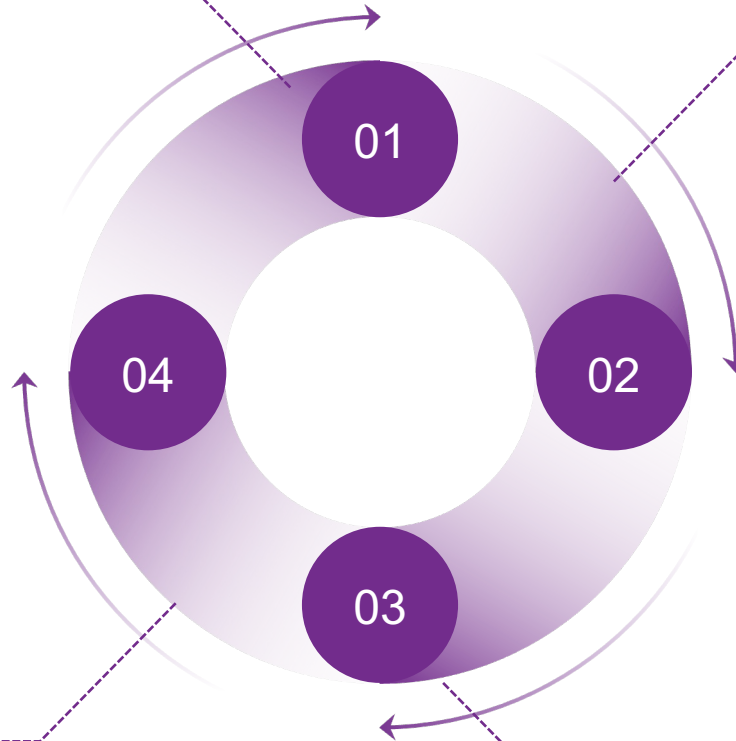

## Flytronics Laboratory

## Traceability System

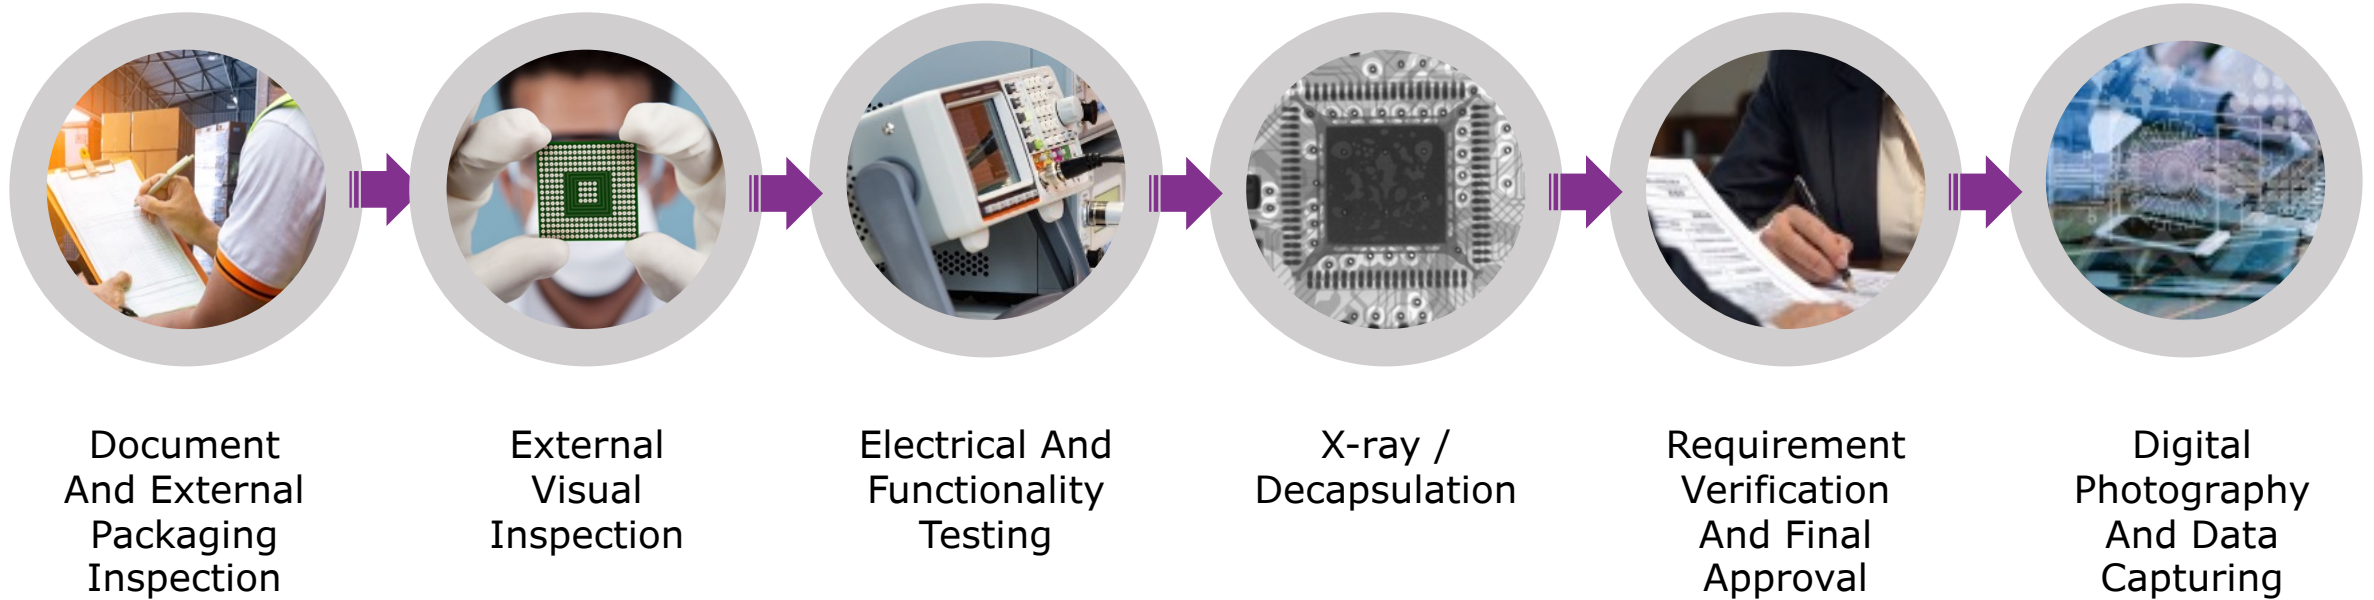

Flytronics has implemented an industry-leading tracking system to trace part numbers, COO, date codes, lot numbers, and comparison tests with golden samples for each transaction.

A risk-based inspection process - executed rigorously for different supplier levels, and customer demands - to ensure the products' quality before receiving.
