BEST VISION PROVIDES 2 MAIN CATEGORY OF PRODUCTS

High-end Eyewear

Combines luxurious materials such as premium acetates, titanium, and precious metals with cutting-edge lens technology to create not only functional vision tools but also fashion statements.

Mass Production Eyewear

Creating eyewear frames at scale by injecting molten plastic into molds. Mass-produced eyewear is accessible to a wide range of consumers and offers a variety of stylish and high value / price ratio options.

AUDIT/ CERTIFICATE

Best Vision operates from two primary production facilities that uphold the highest standards in quality and compliance. Our production sites proudly hold certifications in accordance with BS EN 12312-1:2022 as well as BSCI, GRS, and HIGG audits, underscoring our commitment to excellence and sustainability.

BEST VISION TAIZHOU FACTORY

Our production team is specialized in precision injection molding techniques. This facility is dedicated to crafting eyewear with utmost precision and consistency.

BEST VISION SHENZHEN FACTORY

This facility specializes in the intricate art of high-end metal engraving techniques and the innovative design of acetate eyewear. Through our meticulous craftsmanship, we kept planning and developing our portfolio of premium eyewear offerings.

PPP INSPECTION: STRICT QC PROCEDURE IN EYEWEAR INDUSTRY

Our factory maintains a strict, comprehensive quality control process at each production stage. Our commitment to uncompromising quality spans from raw materials to final products, deeply ingrained in our operational ethos.

PPI	DUPRO	PSI
Pre-production inspection	During production inspection	Pre- shipment inspection
Verify all necessary materials, components and specs are in place and meet customer requirement	Identify potential issues early in production process	Examine eyewear functions and spec
Check raw materials, production facilities and production samples	Take timely corrective actions if there is any quality issue	Assess the overall appearance and surface finish
Run record-keeping system to ensure the quality are in line with industry standard	Check work-in-process eyewear for any defects	Check labeling details and packing materials Confirm the quantities for shipment

03. Craftsmanship & Creation

Innovative Exploration
Creation Adventure-SUMS
Sustainability

INNOVATIVE EXPLORATION

Design & Development

Continually innovate and merge aesthetics with cutting-edge technology.

Extreme Craftsmanship

Focus on refined craftsmanship to develop high-end eyewear.

Refined Detail Design

Apply refined craftsmanship to realize detail design.

Functional Creation

Meet diverse needs and preferences of eyewear design.

Lens Tech

Partner with lens companies to develop new collections.

Material Experimentation

Explore sustainable, light weight materials to craft frames.

CRAFTSMANSHIP & CREATION

Strong design capability

Best Vision specializes in realizing new eyewear design concept into new collections with meticulous attention to detail. We have a solid design team with speedy design capability.

High-end eyewear

High-end Titanium eyewear/ Metal engraving eyewear/ Acetate eyewear

Our experienced craftsmen are dedicated to constant refinement of manufacturing techniques. With high-quality craftsmanship and refined Titanium finish and detailed metal engraving design; Best Vision eyewear stands out from other suppliers in China.

Just-In-Time supply chain

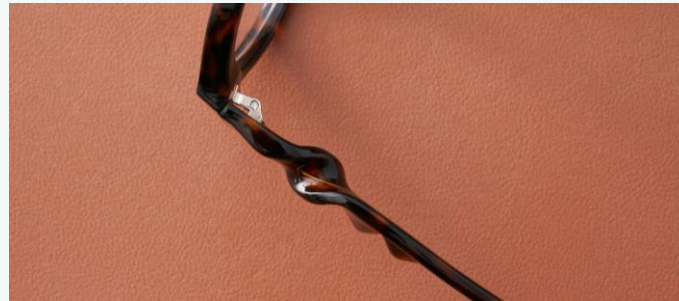

With solid collaboration with customers and agreement on a predictive forecast, we offer an optional JIT program for batch mass production.

EXPERT CRAFTSMANSHIP & THE POWER OF CREATION

Best Vision pursues a long-term development strategy based on the constant reinvention of eyewear, with classic materials, creativity, and new design ideas.

Best Vision has taken an industry lead by re-designing our machines for the production of the cutting-edge design of twisted temples.

Refined metal engraving

Craftmanship with refined patterns

Refined and precise metallic shades

Classic horn eyewear

Luxurious Finish
Refined cutting techniques

Spliced acetate eyewear

Remarkable color variability curated by skillful colorists
Flexible pattern design & High-level techniques developed by true craftsmen

CREATION ADVENTURE - SUMS

In 2022 BEST VISION launched a special project X. “X” stands for experiment, where the purpose is to start from a problem-solving perspective to find potential optical or eyewear issues and develop solutions.

Instead of focusing on production process or technical aspects of eyewear production, we have been taken a fresh look at the industry, seeking a totally new direction with greater vision.

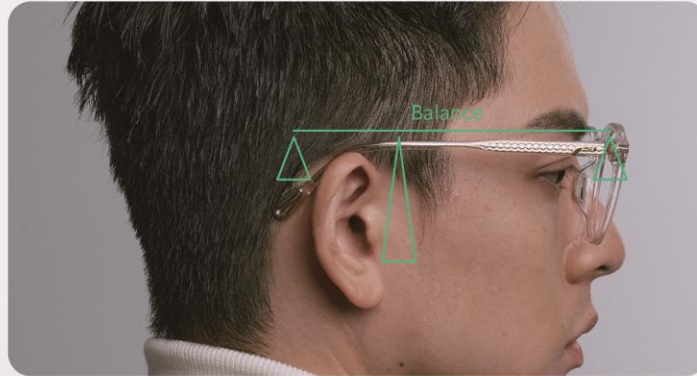

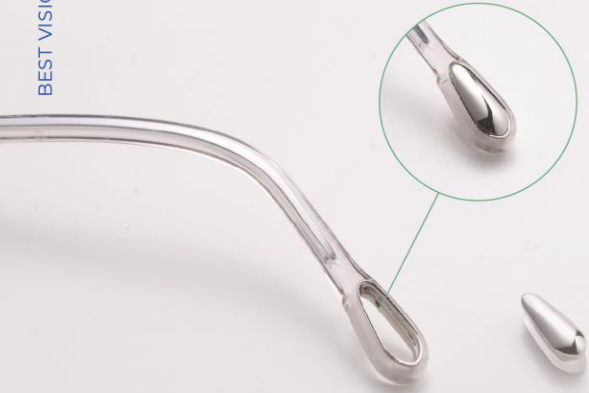

SUMS is the first product that has been born, based on the concept of “Most comfortable eyewear for high power users”. It has developed several functions, such as S hinges, modular air-filled nose pads, and balance capsules.

SUMS won the iF DESIGN AWARD 2023, and was also awarded 4 patents, including 2 utility patents.

Our team are looking forward to exploring more projects and opportunities with your esteemed company.

CREATION ADVENTURE - SUMS

SUMS Eyewear is an ergonomic brand committed to maximizing wearer comfort and breaking down the barriers of wearability.

Best Vision developed 3 creative functions that help glasses wearers in their day-to-day lives.

S-hinge

Designed to flex outward to fit any face shape. The extra bend at the hinge prevents painful pressure against the temples.

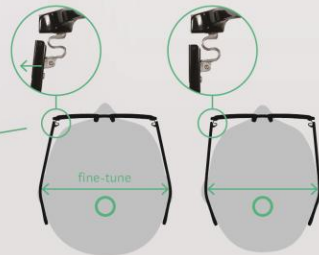

Modular air-filled nose-pads

Helps to release pressures on the nose. Designed to be easily changed based on the user's height of nose bridge with 3 different options available.

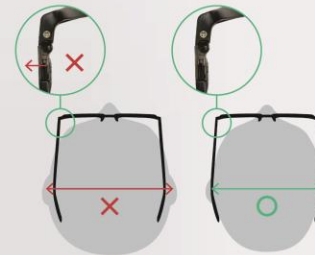

Balance capsule

The balance capsule on temple tips can help eyewear to stay centered and release pressures on the nose and front of frame.

SUMS with S-Hinge

Other without S-Hinge

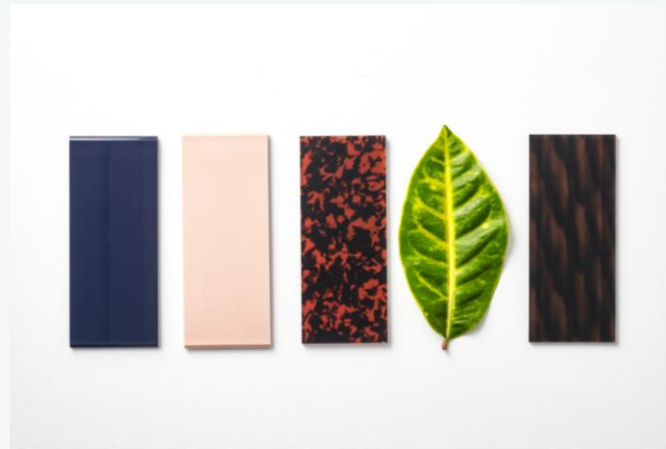

SUSTAINABILITY

Best Vision have been working hard to introduce more responsible and eco-friendly materials into production, exploring various resin and sheets with different advantages and limitations. Our commitment to the environment runs deep and goes hand in hand with the products we make and the people who make them.

Being sustainable brings us great satisfaction, big challenges and continuous innovation.

Now we can use traceable, renewable and recycled materials to make eyewear with the same quality, while making a difference in nature. And you don't need to worry about sacrificing either performance or price to make the world a better place.
